PROFESSIONAL SUMMARY

Software Engineer with an MSc in Software Engineering and commercial experience developing secure, high-performance applications within Agile environments. Currently working at Motorola Solutions, building WPF/MVVM applications, integrating real-time device communication protocols, and contributing to security-critical systems using C#, .NET, and modern development practices.

Experienced in collaborating across technical and non-technical teams, with a background spanning software development, technical support, and customer-facing roles in regulated environments. Skilled in problem-solving, stakeholder communication, and delivering reliable solutions under pressure. Passionate about creating impactful software that balances technical excellence with user and business needs.

EXPERIENCE

Software Developer Avaloq – Credit team

Aug 2026 – Present

- Develop and maintain banking solutions using PL/SQL and Avaloq Script within the Avaloq Core Platform (ACP).
- Work as part of a multidisciplinary Agile team, collaborating with developers, business analysts and other stakeholders to deliver high-quality banking software.
- Contribute to the development, enhancement and maintenance of core banking functionality, ensuring solutions meet technical and business requirements
- Build knowledge of the Avaloq Banking Platform and financial services domain, with progress towards ABR/S certification

Graduate Software Engineer Motorola Solutions

Nov 2025 – July 2026

- Architected modular, high-performance UI components using WPF and MVVM, ensuring high maintainability and performance for security-critical applications.
- Engineered real-time device discovery protocols using ONVIF standards, enabling seamless integration with a wide array of IP cameras and hardware sensors.
- Optimized video metadata processing by integrating Tranquility APIs, streamlining backend data communication and reducing latency.
- Tracked tasks and contributed to sprint planning using Jira within Agile workflows.
- Leveraged GitHub Copilot to accelerate development while maintaining code quality through peer reviews.
- Managed build artifacts and dependencies using JFrog Artifactory, ensuring reliable and secure package distribution.

Account Specialist II Chase Bank

Jun 2025 – Oct 2025

- Resolved 50+ complex customer queries daily, applying structured problem-solving and empathy to deliver high-quality service under strict compliance requirements.
- Detected and reported five recurring billing problems, leading to the implementation of new validation rules and a 12% reduction in customer complaints.
- Identified and flagged fraud indicators in customer accounts, completing UARs and SARs to support fraud prevention, FCA regulations, and secure banking operations.
- Strengthening stakeholder communication by liaising across departments to resolve challenges efficiently.
- Built transferable skills in attention to detail, resilience, and documentation.

Entry-Level Software Developer NISOC

Sep 2021 – Oct 2022

- Developed and maintained full-stack applications using C#, .NET, JavaScript, and React, implementing responsive user interfaces and integrating REST APIs within an Agile development environment.

- Applied professional engineering practices within Agile delivery, contributing to daily stand-ups, sprint reviews, and iterative releases.
- Supported cross-functional collaboration between developers and stakeholders, ensuring business requirements translated into practical solutions.
- Gained experience in solving problems under time constraints, balancing quality with project deadlines and SDLC stages.

IT Helpdesk Technician

Oct 2020 – Feb 2021

Hiva Tech

- Delivered 150+ technical solutions for staff and clients, boosting system uptime and continuity of operations.
- Trained staff in IT practices, demonstrating mentoring and communication skills.
- Documented resolutions and processes to improve team knowledge sharing.

PROJECTS

Drilling Project Milestone Tracker (C# and Angular)

Self-Directed Project, 2024

- Built a full-stack application using ASP.NET and Angular, developing interactive JavaScript-based user interfaces, REST API integration, and responsive components for tracking drilling project milestones.
- Demonstrated initiative, independence, and structured problem-solving.

Warehouse Management Application (.Net and Razor pages)

NISOC Project, 2022

- Designed a role-based management system with CRUD functionality and SQL integration.
- Improved efficiency of store operations by streamlining inventory and access.

Spam Review Detection (Python and ML)

MSc Dissertation, 2023

- Developed an AI-driven model detecting fraudulent e-commerce reviews with 86% accuracy.
- Applied analytical skills, experimentation, and full SDLC from requirements gathering to testing.

SKILL

- Collaboration & Agile teamwork
- Communication & stakeholder engagement
- Analytical & problem-solving mindset
- Customer-centric approach & adaptability
- Fraud Prevention & FCA compliance awareness
- **Technical toolkit:** JavaScript (ES6+), React, Angular, C#, ASP.NET, Razor Pages, Java, Python, SQL, Unit Testing, Azure, JFrog (Artifactory), Jira, GitHub Copilot.

EDUCATION

MSc Software Engineering

Jan 2023-Oct 2024

Heriot-Watt University

Notable Modules: Industrial Programming, Advanced Software Engineering, Advanced Human-Computer Interactions, Rigorous Methods for Software Engineering, Distributed and Parallel Technologies, Research Methods and Project Planning, Systems Engineering.

Dissertation: Spam Review Detection for E-Commerce (Python) – Analyzing large JSON datasets with an accuracy of over 86% to detect spam reviews.

CERTIFICATIONS & AWARDS

- Career Essentials in Software Development, by Microsoft and LinkedIn 2023
- 1st place in Heriot-Watt coding competition (Integrated Inversion) 2024
- 2nd place in Heriot-Watt coding competition (Jovial Jones) 2023

VOLUNTEER WORK

Tutor
Remote

Dec 2022 – Present

- Delivered English and Mathematics lessons to Afghan girls excluded from education.
- Designed supportive, engaging lessons that built confidence, resilience, and long-term growth.

INTERESTS

- Coding competitions
- Chess
- Hiking
- Sci-Fi and Animations
